Sentari Build

Your ADU, at full size

What to expect from your Sentari Build visit, and how to use your link afterwards

Your builder will show you your new ADU at full size, standing right where it will be built in your yard. You wear a headset that lets you see your real yard with the ADU drawn into it, so you can walk through the rooms, open the doors and try different finishes before anything is built.

During your visit

- A visit takes **15 to 25 minutes** in the headset. Wear flat, comfortable shoes.
- Your builder's rep stays beside you the whole time and outlines a clear, flat area to walk in. Near its edge the headset shows a fence; if you step past it, the ADU disappears and a card tells you which way to step back.
- **Walk slowly.** You will still see your yard through the headset, but take the headset off whenever you want to look at something properly.
- Press the **trigger** to open doors. Press **X** for the menu, where **Options** changes finishes and shows the price.
- Want to walk it together? Ask your builder to bring a second headset: two people can see the same house in the same spot.

> **SAFETY**
>
> Stop and tell the rep if you feel dizzy or uncomfortable; sit down and take the headset off.
>
> The walkthrough is for ages 13 and older. Anyone under 18 needs a parent or guardian with them.

After your visit: your link

Your builder can text or email you a private link. Open it on your phone or computer, no app needed:

- **Spin the 3D model** with your finger, outside or inside (roof off).
- **Make it yours:** change the options; the total and monthly payment update as you go.
- See the **floor plan**, the **site plan** and the **estimate** by category.
- When you're happy, press **Send my picks**. Your choices go straight to your builder.

If you own a Meta Quest

Ask your builder for a **headset code**. In the Sentari Build app on your Quest, choose Home ▸ **Open a shared plan** and type the code. The ADU downloads to your headset so you can walk it again at home. Codes work for 7 days.

Your privacy

- The link shows the plan, the prices, and your name and address as your builder entered them. It never shows your email, phone number or notes.
- Anyone you forward the link to can see it, so share it only with people you choose.
- Your builder can turn the link off at any time; ask them if you'd like it removed.
- Prices are your builder's **estimate, not a bid**. Your contract sets the final price.
