Sentari Build

Quick Start

Keep this card in the kit case. The User Manual has the details.

THE DAY BEFORE

- ☐ Plan finished on the computer, client's name and address in the **Client** tab
- ☐ The plan priced with **your** prices, not the sample (the app stops and asks before a proposal or share link goes out on sample prices)
- ☐ Plan open on the iPad and sent to the headset (iPad **Quest** ▸ **Send to Quest**); it opens from Home ▸ **Open saved…**. Send it to the second headset too if two people will walk together.
- ☐ Settings ▸ **Set as demo start** on the headset
- ☐ Headsets, spare strap batteries, iPad, power bank and phone charged to 100%; spare AA batteries and wipes packed; waiver forms and Homeowner Guides in the lid

ON SITE · ABOUT 10 MINUTES

1 Check the yard, headset off

Clear hoses, toys and anything to trip on. Pick a flat, open area away from pools, slopes and the street.

2 Stake two corners

Measure two ADU corners from the lot lines on the site plan; mark each with a stake or chalk.

3 Hotspot on

Turn on your phone's hotspot; keep the phone near the middle of the yard. The headset and the iPad join it by themselves.

4 Put the house down

Headset on yourself: Home ▸ **Mixed reality** ▸ **Continue**. Press **X** ▸ View ▸ **Align 2 corners**: corner knob, trigger; controller tip on the stake, trigger. Repeat for the second corner.

5 Outline the safe area

Settings (gear) ▸ OUTDOOR SAFETY ▸ **Outline safe area**: trigger at 4 or more corners of the clear, level ground, **A** to close. Or **Use the lot lines**.

6 Client view on

Settings ▸ **Present to a client**. The card should say "Stay inside the outlined area". If it says "Stay inside the boundary", you skipped step 5: leave client view and outline the safe area.

7 Waiver, then hand over

The client signs the waiver. Headset on them, controllers in hand. Teach two things: the **trigger** opens doors, **X** opens the menu. You hold the iPad and stay within arm's reach.

DURING THE VISIT

A second person wants to walk too? On the first headset: Together ▸ **Invite a headset**. On the second: Home ▸ **Join a headset** ▸ the first headset. Look around near it until it says "Found the room".

On the iPad: change a finish or move a wall and it changes in the headset (**Quest** ▸ **Live sync** on).

Button	What it does
Trigger	Press menu buttons; open and close doors
X (left)	Show or hide the menu
Left stick / right stick	Walk / turn (VR only)
Menu ▸ Options	Change finishes; the price updates
Menu ▸ Tour	Go to your saved views
Menu ▸ View	Mixed reality or VR; see-through walls (70%, 40%)

AFTER THE VISIT

1 **Send the share link**

On the iPad ▸ Client tab ▸ **Make a share link** (or **Update the link**) ▸ **Copy link** ▸ text it to the client.

2 **Log the visit**

One line in the Client visit log; hand the client a Homeowner Guide and the feedback card.

3 **Reset the headset**

Home ▸ **Reset for next client**.

4 **Clean and pack**

Wipe face pads; dry microfibre on the lenses. Lenses capped, hotspot off, case latched. Charge everything when you're back.

IF SOMETHING GOES WRONG

You see	Do this
"Couldn't find where this house was placed"	View ▸ **Align 2 corners** again
"Tablet not connected"	Headset and iPad both on the phone hotspot; Sentari Build open on the iPad
A red "Step back inside" card; the house is gone	The client is outside the safe area. Walk them back in; the house returns
Join a headset doesn't show the first headset	Both on the phone hotspot; press **Invite a headset** again
House drifts or jumps	Look at fences and the main house for a few seconds; don't face low sun
Reset for next client does nothing	Settings ▸ **Set as demo start** first
Headset hot or picture freezes	Off and into the shade for 10 minutes
A headset won't work at all	Use the other headset; email us the same day

SAFETY

The fence in the headset warns the client near the edge of the safe area. You are still the boundary. Stay within arm's reach of the client the whole visit.

Never point the lenses at the sun, even for a moment on a table.

Ages 13 and older, waiver signed first. Help: support@sentarivr.com (weekdays 8–6 Pacific) or Help ▸ **Contact support** in the app.
